WELCOME TO THE “BRED TUFF” ANGUS SALE 2017 FROM MEDLYN ANGUS

A single bull's genetic influence has the potential to significantly impact the future direction of your herd. Selection indexes calculated for Angus bulls reflect both the short term profit generated directly through the sale of progeny and a longer term profit generated by daughters in a self-replacing cow herd. Choose carefully.

This year we believe we are presenting some excellent young carcass bulls. The combination of genetics and over 30 years of breeding we have used the following sires to achieve this:

- 1) **Deer Valley All In USA17307074**. This bull combines the genetics of Mytty In Focus and Sitz Upwards 307R (on dam side). He is a trait leader for 200d, 400d, 600d growth and carcass weight with very high heritability percentages for these traits. He is presenting calving ease, tremendous growth with his dam a leader for marbling.
- 2) **HF TIGER 5T** (CAN1402252). This Canadian sire has a large number of progeny analysed by Breedplan being used in 85 recorded herds with 168 daughters and having a total of 757 progeny. The results indicate a calving ease bull and a trait leader for milk with very high heritability percentages for nearly every trait measured esp growth, mature cow weight, eye muscle area, rib and rump fat and retail beef yield.
- 3) **Ayrvale Genetic G11** (HIOG11). This bull is a trait leader for growth 200d, 400d and 600day with high heritability percentages. He has exceptional index values for all measured indices.
- 4) **Ardrossan Equator A241** (NAQA241). A son of Papa Equator 2928 born in 2005, he is still a trait leader for milk, days to calving and carcass weight with very high heritability percentages plus well above average values for all indexes.
- 5) **Ardrossan Equator D19** (NAQD19) combines NAQA241 & Stockman 2164 (USA2164) genetics giving positive figures for carcass weight, eye muscle area, rib and rump fat and intramuscular fat%.
- 6) **AHWJ6** a maternal brother to NAQA241, sired by TC Aberdeen 759, born in 2013. This young sire's Breedplan figures show just how genetics work having only been used within our herd. He has above average values for all indexes. His daughters will come into production next year.
- 7) **NJGJ47** shows strong growth figures with above average index figures. His dam is a Regal, a very strong cow family within our herd.
- 8) **SAV Harvester 0338** (USA16687737) is a trait leader for 200d, 400d and carcass weight also displaying strong index values.

Be sure to talk to us about this year's bull selection, if we know how your cow herd is made up and what you would like to achieve we can help direct you towards your sire selection.

Regards

John, Ellen & Rodney Gibson

WELCOME TO INGLEBRAE FARMS ANGUS

Once again in 2017 our complete line of sale bulls are being offered at the Bred Tuff bull sale, with a slight increase in numbers which will see thirty bulls catalogued.

Inglebrae sale bulls have been grown on improved pastures and have had access to mineral licks throughout their life. The bulls will be presented for sale in good condition ready for work off oats crops and home grown silage - 'NO GRAIN'.

The bulls we put before you are showing plenty of softness and natural doing ability and growth for age. This year we have some different genetics with 14 sons of Booroomooka Barnaby H722, 10 sons of Bald Blair 1664 Consensus J117, 1 son of Highlander of stern AB and 5 grandsons (which are not registered) of our much loved Booroomooka Neutron D314 - which we are putting through our entire commercial herd.

If you like to buy lines of bulls we have a strong line of 'Barnaby' and 'Consensus' sons coming on for 2018 sale as well, with new genetics appearing each year for your selection.

The health treatments have the bulls fit and ready to work with them receiving: 7 in 1, Cydectin (pour on), Vibrio, tick fever and 3 day sickness. All bulls are tested Pesti free.

The bulls are semen morphology tested prior to the sale and will all be at the high level of 70% or more.

We highly recommend that you keep your bulls up to date with their vaccinations that we have started for the health and longevity of your purchase. Also keep your younger bulls separated from your older bulls, allowing them to recover and grow out after their first season of working for you.

We always look forward to feedback on our bulls - it's good to know how they are performing. And thank you for the confidence that you have put in Inglebrae Farms Angus to provide sound, soft, easy doing bulls that are BRED TUFF for you.

We at Inglebrae have a strong commitment to contributing to the Angus breed in the bulls we put before you and also in the commercial herd we operate consisting of 700 commercial breeders with their progeny being grown out to feedlot weights. To learn more of our commitment to the industry and for Pre-sale info on the bulls and pics visit www.inglebraefarmsangus.com.au

Thankyou
Darren Battistuzzi
Manager

SALE INFORMATION

DIRECTIONS: The Silver Downs selling complex is located 3kms from Tenterfield on the Bruxner Highway.

HEALTH: All bulls have been vaccinated with 3 Germ.

GST: GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price plus GST.

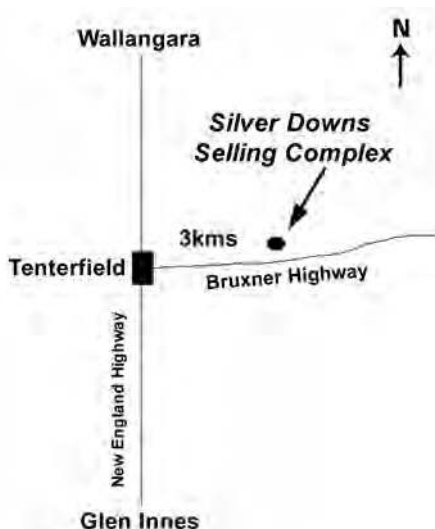

REBATE: 2% rebate to outside Agents introducing buyers in writing 24 hours prior to the Sale.

INSPECTION: Bulls may be inspected prior to the Sale by contacting vendors or selling agents. Cattle will be available for inspection from 9am on sale day.

INSURANCE: We recommend bulls are insured against injury and death.

REFRESHMENTS: Refreshments will be available at the sale.

DISCLAIMER: The vendors, agents and their representatives accept no liability for accidents that may occur to any person attending the sale. Visitors enter the cattle pens at their own risk. Children must not enter the yards. While all care has been taken in the preparation of this sale catalogue, vendors and agents accepts no responsibility for any errors or omissions contained in this publication.

JUNE 2017 ANGUS AUSTRALIA GROUP BREEDPLAN AVERAGE EBVS FOR ALL 2015 DROP CALVES

+56	+4.6	+0.0	-0.2	+0.3	+1.6	+\$106	+\$103	+\$109	+\$105

ARRIVAL OF BULLS

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company. Provide hay and water, then leave them alone until the next morning.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later. When the young bulls are working, inspect them regularly and closely.
