Welcome to the 2020 Medlyn Angus Sale

Our 2020 sale bulls are registered, performance recorded, PI tested free and fully vaccinated.

A single bull's genetic influence has the potential to significantly impact the future direction of your herd. Selection indexes are calculated for angus bulls to reflect both the short term profit generated directly through the sale of progeny and a longer term profit generated by daughters in a self-replacing female herd.

We have been breeding angus cattle for over 30 years and our bulls are raised under commercial conditions, coastal dryland farming and cropping with high humidity and very high stocking rates.

We believe we are presenting some excellent young carcass bulls. The combination of genetics in the following reference sires with our female herd has allowed us to achieve this.

- 1) ABERDEEN ESTATE JUST RIGHT J6 (AHWJ6)
- a maternal brother to NAQA241, sired by TC Aberdeen 759 born in 2013. His genetics show him to be above average for all indexes & he has been used solely within our herd. He is now on lease to Clunie Range.
- 2) QUAKER HILL DEAD CENTER (USA17831035)
- a bull with calving ease and an excellent 400 day growth, combines in a package a breed leading EBV profile, an eye appealing phenotype, excellent feet and legs.
- 3) SAC CONVERSATION (USA17808532) –
impeccable skeletal design and muscle shape, wide based, square hipped, tremendous depth of body with wide top and a bold rib shape.
- 4) JMB TRACTION 292 (USA17262374) – an outcross performance sire adds volume and capacity, depth plus base width. His figures indicate he is a trait leader for 200 day, 400 day, 600 day growth, EMA and RBY. An ideal range for our herd.

- 5) BALDRIDGE COMMAND C036 - Command was chosen by us as he appeared to be a complete young bull that would advance our breeding goals. His figures for all traits are in the top 5% for the angus breed. He has calving ease with awesome phenotype, tremendous body & thickness. With 400day weight +109 (top 1%), 600day weight +140 (top2%), EMA +11.2 (top 5%), along with very strong breeding indexes he fitted into our breeding programme very well. His calves are born THICK & with no problems.

- 6) CARTERS COUNTERWEIGHT - Counterweight is another sire with low birthweight & calving ease, having super sound structure with extra rib mass plus good muscle & thickness. He is docile & easy to handle and will add more length & frame to progeny.

- 7) MEDLYN MURRAY NJGM46 - M46 was chosen as our back up sire this year as he combined Coonamble Elevator E11 genetics (powerful frame plus high growth, weight gains & good structure) with a Sitz Upwards daughter that provides plenty of milk. She is a very strong cow within our herd.

We look forward to seeing you on sale day.

John, Ellen & Rodney Gibson

BRED TO PERFORM

Sale Information

DIRECTIONS

Primex Selling Complex, Casino NSW.

HEALTH

All bulls have been vaccinated with Vibrio x 2 , 7 in 1 x 2, 3-day sickness x 2, blooded- 3 germ, Botulism.

GST

GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price plus GST.

REBATE

2% rebate to outside Agents introducing buyers in writing 24 hours prior to the Sale and settling on their behalf within 7 days.

INSPECTION

Bulls may be inspected prior to the Sale by contacting vendors or selling agents. Cattle will be available for inspection from 9am on sale day.

INSURANCE

We recommend bulls are insured against injury and death.

REFRESHMENTS

Refreshments will be available at the sale.

DISCLAIMER

The vendors, agents and their representatives accept no liability for accidents that may occur to any person attending the sale. Visitors enter the cattle pens at their own risk. Children must not enter the yards. While all care has been taken in the preparation of this sale catalogue, vendors and agents accepts no responsibility for any errors or omissions contained in this publication.

SELECTION INDEXES

ANGUS BREEDING	DOMESTIC INDEX	HEAVY GRAIN	HEAVY GRASS
+\$118	+\$111	+\$124	+\$115

ARRIVAL OF BULLS

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate yards with other cattle for company. Provide hay and water, then leave them alone until the next morning.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later. When the young bulls are working, inspect them regularly and closely.
