***'Bloodlines that will improve your
herd quality & your bottom line'***

Welcome to the 2023 Medlyn Angus Sale

ALSO USING THE SERVICES OF AUCTION PLUS

Another 12 months has passed and our bull sale is fast approaching. We are offering at auction 34 pedigree angus bulls. We have been breeding and marketing our performance recorded bulls for 38 years featuring a self replacing female herd. We endeavour to build trust, create value and deliver results for our clients. The aim of every beef producer should be to produce an animal that has improved eating quality and tenderness for our end recipient---the beef consumer.

We endeavour to select sires that have high carcass merit with larger frame for plenty of red meat combining with a calving ease structure that clicks with the strong maternal traits of our female herd.

Our catalogue photo portrays NJG21S18 (LOT 3). He is well grown and displays natural thickness and is another son of Clunie Range Maximum.

Our bulls are fully vaccinated 7/1, vibrio, botulism, 3 day sickness and blooded (3 germ). They have all tested negative to pestivirus antigen. They will be semen and morphology tested just prior to sale day.

In this year's sale we have sons of Aberdeen Estate Just Right J6 (AHWJ6), Clunie Range Maximum (NBHM528) and Medlyn Lodge (NJGL91).

These sires have produced progeny that have performed well and are highly sought after. They have natural thickness, are muscular and have large EMA and RBY. Their daughters are feminine with capacity and milk.

Baldrige Command C036 is another sought after sire. He gives tremendous body and thickness, has calving ease, a complete sire, deep, thick and square. His progeny are docile.

Bubs Southern Charm is a new AI sire to our herd. He brings performance carcass genetics and a phenotype favourite with sound structure, fleshing ability, muscle shape and added capacity. EMA +9.1, IMF +3.3.

JMB Traction has been used as an outcross sire within our

herd and adds volume and capacity plus width.

Varilex Geddes 7068 has been a much sought after sire within the angus world, both stud and commercial. He has calving ease, growth and carcass traits. His progeny are thick, easy doing and structurally sound.

Sydney Enhance is extremely docile, has great feet and legs, long bodied with big depth of body. He has low birth weight and is in top 10% for all growth EBV's.

LD Capitalist 316 is another new AI sire in our herd. He is a structural and phenotype stand out being very deep, wide based, muscular with a strong top line. He has low birth weight.

Again we look forward to seeing you on sale day.

John, Ellen and Rodney Gibson

Sale Information

DIRECTIONS

PRIMEX Exhibition Centre, Casino NSW, starting at 11am.

GST

GST is to be added onto the purchase price at the fall of the auctioneer's hammer. You will be invoiced purchased price plus GST.

REBATE

2% agents rebate to agents who:-

- Introduce buyers in writing at least 24 hours prior to the sale
- Settle accounts within 7 days.

3% agents rebate to agents who:-

- Introduce buyers in writing at least 24 hours prior to the sale
- Accompany client to the sale
- Settle accounts within 7 days

INSPECTION

Bulls may be inspected prior to the Sale by contacting vendors or selling agents. Cattle will be available for inspection from 9am on sale day.

INSURANCE

We recommend bulls are insured against injury and death.

REFRESHMENTS

Refreshments will be available at the sale.

AUCTIONSPLUS

The sale will be interfaced with AuctionsPlus. To register visit www.auctionsplus.com.au prior to the sale.

BRINGING YOUR NEW BULL HOME

When the bull or bulls arrive home, unload them at the yards into a group of house cows, steers or herd cows. Never jump them from the back of a truck directly into a paddock—it may be the last time you see them. Bulls from different origins should be put into separate

yards with other cattle for company. Provide hay and water, then leave them alone until the next morning.

MATING NEW YOUNG BULLS

Newly purchased young bulls should not be placed with older herd bulls for multiple-sire joining. The older, dominant bull will not allow the young bulls to work, and will knock them around while keeping them away from the cows.

Use new bulls in either single-sire groups or with young bulls their own age. If a number of young bulls are to be used together, run them together for a few weeks before joining starts. They sort out their pecking order quickly and have few problems later. When the young bulls are working, inspect them regularly and closely.

BREED AVERAGE EBVS

The breed average EBVs below represent the average EBVs of all 2021 drop Australian Angus and Angus-influenced seedstock animals analysed in the Mid May 2023 TransTasman Angus Cattle Evaluation.

	CED	CEM	GL	BW	200D	400D	600D	MCW

ANGUS AUSTRALIA PARENT VERIFICATION SUFFIX KEY

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA

SV : the sire has been verified by DNA

DV : the dam has been verified by DNA

: DNA verification has not been conducted

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this can-not be confirmed conclusively.

DISCLAIMER

The vendors, agents and their representatives accept no liability for accidents that may occur to any person attending the sale. Visitors enter the cattle pens at their own risk. Children must not enter the yards. While all care has been taken in the preparation of this sale catalogue, vendors and agents accepts no responsibility for any errors or omissions contained in this publication.

Farm Insurance

Specialist agricultural insurer, Achmea Australia, supports the 2023 Medlyn Angus Bull Sale
